

GBC International Growth Fund

Investment Objective & Strategies

GBC International Growth Fund seeks to provide investors with long-term growth through capital appreciation by investing primarily in diversified portfolio of small to mid-sized foreign companies located outside of the United States. The investment analysis for the Fund is based on three levels of decisions. The first involves the decision to underweight or overweight certain regions or countries of the world. The second involves the currency allocation of the Fund. The third involves sector and security level analysis of the Fund. The objective of this three-level decision making approach is to combine the benefits of top-down analysis with that of a detailed bottom-up security selection. This process involves evaluating the financial condition and management of a company and its industry, as well as the health of the overall economy.

DISCLAIMER

Commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing.

The indicated rates of return are the historical annual compounded total returns including changes in unit value, reinvestment of all distributions and do not take into account sales charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

The Morningstar Rating and category quadrants were developed by Morningstar Research Inc. who reserves all rights. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Quartile rankings are compiled by sorting the funds by returns and range from 1-4 for all time periods covered, and can change monthly. The top performing 25% of funds in each fund category are assigned a ranking of 1, and the next 25% a 2, etc.
