

Pembroke Canadian Balanced Fund

Formerly Pembroke Growth and Income Fund

Investment Objective & Strategies

The Pembroke Canadian Balanced Fund seeks to provide investors with a reasonable balance between long-term capital growth and income to diversify risk. The Fund invests primarily in equities, bonds and other marketable securities. The Fund's strategy involves creating a balanced portfolio by investing primarily in shares of dividend paying Canadian publicly listed issuers, as well as Canadian federal and provincial bonds, corporate bonds and money market instruments. The Fund may also invest a maximum of 30% of its portfolio in foreign publicly listed issuers. The Fund may make these investments directly or by purchasing units of other qualified funds.

While no fixed percentage of the Fund's net assets is dedicated to investing in the securities of other mutual funds, the Fund may invest up to 60% of its net assets in securities of externally managed public equity funds and fixed income funds including exchange traded funds. The Fund will invest in other mutual funds when it is more efficient or provides more diversity than investing in individual specific securities.
