PEMBROKE AMERICAN GROWTH FUND INC.

Investment Objective and Strategies

Pembroke American Growth Fund Inc. (the "Fund") seeks to provide shareholders with long-term capital growth by investing primarily in small to mid-sized US companies. To achieve the Fund's investment objective, we invest primarily in companies that have sustainable growth opportunities, a solid financial position, and a capable management team.

Risk

The overall risk of the Fund is as described in the Simplified Prospectus. There were no material changes to the Fund over the financial year that affected the overall level of risk associated with an investment in the Fund. The Fund is suitable for investors who have a medium-to-high tolerance for risk and are seeking long-term capital growth. The Fund holds US securities and, as a result, is exposed to US dollar currency risk. It is not the Fund's policy to hedge currency exposure as the Board of Directors and Pembroke Management Ltd. ("Pembroke") do not believe that hedging will add value in the long-term.

Results of Operations

For the year ended December 31, 2024, the Fund posted a return of 20.43%. In comparison, the Fund's benchmark index, the Russell 2000 posted a 21.35% return for the year. For the year ended December 31, 2023, the Fund posted a return of 12.35% compared to the Fund's benchmark which posted a return of 14.18%.

Pembroke's portfolios are generally differentiated from the benchmarks they seek to outperform. In this case, the Fund is more concentrated than the Russell 2000. Further, the Fund has very different industry exposures than the benchmark offers. By investing in a select group of high-quality growth companies, Pembroke seeks to deliver superior risk-adjusted returns when measured over the long term while accepting that short-term relative performance can vary negatively or positively to a significant degree.

Pembroke's US equity portfolios rose in 2024, following strong results in 2023 and a difficult 2022. Performance was largely in line with that of the benchmark Russell 2000 Index, and absolute results benefited significantly from a strong US dollar. Pembroke was encouraged by the fundamental progress made at many of its holdings in terms of per share revenue and profit growth. Management teams executed on share buybacks and made opportunistic acquisitions, in many cases taking advantage of their robust balance sheets and market-leading competitive positions. Growth, innovation, and balance sheet strength helped support the performance of holdings in the Information Technology sector, while positions related to automotive and homebuilding struggled to find their footing due to low volumes and slower than expected interest rate cuts projected for 2025. Pembroke is focused on the multi-year opportunity created by the shortage of US housing and believes the pullback in share prices creates an attractive set-up for long-term investors. New idea generation is healthy and demonstrates that the investment team continues to identify attractively valued growth companies in the US small to mid capitalization universe.

Tax software provider Vertex (VERX) saw its shares rise on the back of strong growth and profitability metrics over the course of 2024. The company's expertise helps customers comply with rules in a complex and ever-changing state and municipal sales tax landscape. Given its products lead to efficiencies, cost-savings, and less regulatory risk, Pembroke expects new and existing customer adoption to continue at a robust pace over the next several years.

Cellebrite ("CLBT"), a provider of security software to government agencies and law enforcement, delivered revenue growth of over 20% and free cash flow of over \$120M in 2024. The company garnered media attention for helping crack the iPhone of the individual who shot Donald Trump. From an investor perspective, management is committed to growing sales while also expanding profit margins. CLBT has over \$480M of cash on its balance sheet and no debt, enjoys high levels of revenue visibility, and is reasonably valued.

The investment team decided to exit Sprout Social ("SPT"), which offers services to companies looking to improve their online marketing, as the company's growth rate faltered as it transitioned from servicing mid-sized businesses to focusing primarily on large enterprises. Management did not execute against the objectives it laid out for investors. Pembroke's team continues to follow SPT as its products are compelling and it serves a large end market, but execution needs to get back on track for the firm to consider reinvesting.

Shares in engineering firm Bowman Consulting ("BWMN") dropped after the company raised outside equity and shortly thereafter failed to meet lofty investor expectations for accelerating revenue growth. Nevertheless, 2024 revenue should rise close to 24% above 2023 levels, and the company is expected to generate free cash flow even after servicing its debt obligations.

PEMBROKE AMERICAN GROWTH FUND INC.

Results of Operations (Cont'd)

BWMN is new to the public markets and did not manage expectations well, but the company's fundamentals remain healthy. Pembroke has a long history of successful investments in engineering service firms that acquire small competitors and bring their expertise and relationships under one roof.

At December 31, 2024, the total net asset value of the Fund was \$222.3 million as compared to \$210 million at December 31, 2023. The cash position was 0.45% of net asset value. The number of shares outstanding in the Fund as at December 31, 2024 was 3.4 million compared with 3.9 million as at December 31, 2023.

Unrealized appreciation on investments at December 31, 2024 was \$76.1 million as compared to \$52.9 million at December 31, 2023 resulting in an increase in unrealized appreciation on investments of \$23.2 million. The Fund had net realized gains on investments sold during the year of \$16.4 million.

Fees and Expenses

During the year, the Fund paid a total of \$0.5 million in operating expenses. The management expense ratio ("MER") for shareholders was 0.15%. There are no management fees charged to the Fund since January 1, 2018 as the management fees are charged directly to the shareholders outside the Fund. Refer to the Management Fees section for further details on this.

Shareholder Activity

Throughout the year, \$2.8 million flowed into the Fund by way of subscriptions and \$30.5 million flowed out of the Fund as a result of redemptions.

Related Party Transactions

Pembroke Private Wealth Management Ltd. ("PPW") is the Fund's Manager. The Fund Manager provides the day-to-day management of the business and operations of the Fund. The fees paid to the Fund Manager are shown in the Management Fees section of this report. Pembroke is the portfolio manager of the Fund. Pembroke is the parent company of the Fund Manager, PPW. Pembroke's fees are paid by the Fund Manager, for services including investment, management, administration, advisory and accounting. The related party transactions take place in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Recent Developments

At the Annual Meeting of shareholders, which took place on April 10, 2024, Deloitte LLP were reappointed as the auditor, one Director was re-elected and four Directors were newly elected. The re-elected Director is Mr. Ian Aitken, who has served since 2009. The newly appointed Directors are Mr. J. Matthew Beckerleg, Mr. Jeffrey S.D. Tory, Mr. T John Quinn and Mr. Dominic M. Costantini.

Outlook

While markets rallied following Trump's election victory, the euphoria was short-lived as investors wrestle with the pace central bank rate cuts in 2025. The pullback from equity market highs creates a compelling backdrop for 2025 as valuations in Pembroke's US portfolios are compelling and company-level earnings and profit growth are expected to impress. The firm invests in well-funded companies that are focused on translating revenue growth into long-term progress in per share earnings and cash flow. In 2024, the team identified new opportunities in sectors ranging from Retail to Industrials to Information Technology, reflecting a diverse range of companies with the potential to create significant shareholder wealth over the coming years. However, escalating trade tensions between the United States and Canada, marked by the imposition of new tariffs, have introduced additional uncertainty into the economic landscape, potentially impacting supply chains, corporate profit margins, and investor sentiment as we enter 2025.

Past Performance

The indicated rates of return are the historical annual compounded total return changes in share values and reinvestment of all distributions and do not take into account sales, redemptions, distributions or other optional charges that would have reduced returns. Mutual funds are not guaranteed, their values may increase or decrease and past performance may not be repeated.

The Fund's performance numbers assume that all distributions are reinvested in additional shares of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes, whether paid to you in cash or reinvested in additional shares. The amount of the reinvested taxable distributions is added to the adjusted cost base of the shares that you own. This would decrease your capital gains or increase your capital losses when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-year returns

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year. The percentage figures indicated have been rounded to the nearest whole number due to space constraints.

(1) Since January 1, 2018, management fees are charged directly to shareholders based on their assets under management and Fund performance is reported net of transaction costs and all other expenses, **excluding** management fees and applicable taxes. Prior to January 1, 2018, Fund performance was reported net of transaction costs and all other expenses, **including** management fees and applicable taxes. Refer to the Management Fees section for further details on this.

Annual compound returns

The following table shows the Fund's annual compound total return for the periods shown ending on December 31, 2024. The annual compound total return is also compared to the Russell 2000 Total Return and to the S&P 500 Total Return Indices on the same compound basis.

All index returns are calculated in Canadian dollars on a total return basis.

(1) This information is provided as at December 31 of the year shown.

(2) The management expense ratio ("MER") is calculated in accordance with National Instrument 81-106, based on expenses for the stated year (including Harmonized Sales Tax, Goods and Service Tax, income tax and interest) but excluding foreign withholding taxes, commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the year. PPW may, at its discretion and without notice to shareholders, waive or absorb certain operating expenses. The Fund did not have any expenses waived or absorbed in any of the years presented.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

¹Larger investors or those meeting specific criteria may qualify for lower fees

Management fees paid directly by shareholders of the Fund to PPW through a redemption of shares was \$2.5 million for the year ended December 31, 2024.

Under the Pembroke Family Advantage Program, the value of family holdings of all family members designated by the investor will be considered to determine the management fee applicable to all family members. In order to benefit from the Pembroke Family Advantage Program, family members must be designated by the investor using the form prepared by PPW and must be approved by PPW prior to any management fee reduction being applicable. Management fees are determined based on the amount of assets under management with PPW and Pembroke.

All management fees were used by the Manager to pay costs for managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, and providing other services. For the year ended December 31, 2024, none of the management fees received by the Manager were used to fund commission payments and other dealer compensation (collectively "distribution-related costs") paid to registered dealers and brokers for shares of the Fund bought and held by investors.
