

Pembroke Genesis Pooled Fund – Founders’ Class

Investment Objective & Strategies

The investment objective of the Fund is to provide investors with long-term capital appreciation primarily by investing in a concentrated portfolio of common shares and other equity securities of predominantly Canadian micro-cap and small-cap companies listed on a recognized exchange in Canada and/or the United States. The Fund will invest predominantly in securities with initial market caps ranging from \$50 million to \$500 million (CAD).

The Fund will seek to invest in up to 25 companies that have the potential to produce long-term growth in earnings and cash flow. The investment strategy is a stock picking/bottoms up approach which emphasizes significant proprietary research. The portfolio manager invests in companies with strong aligned management teams and where they think their research provides an information edge. The primary objective of the Fund is to invest in underfollowed smaller Canadian companies with long runways for growth and the chance for significant revaluation as they get discovered.

The Fund will also invest in certain sectors in the US or global markets where there is limited representation in Canada (up to a maximum of 20%) in order to widen the opportunity set for the Fund. The Fund will also have the flexibility to invest up to 10% of the net assets in private or pre-initial public offering (“IPO”) situations.
