## Investment Objective & Strategies

The Pembroke Global Balanced Fund aims to provide investors with long-term capital growth and income through the diversification of assets, geographies, and market capitalization in investing primarily in units of public equity funds and units of fixed income funds including units of equity exchange traded funds.

Under normal market conditions, the portfolio is constructed to achieve an asset mix of 70% units of equity funds and 30% units of fixed income funds, cash, money market instruments, or funds holding of real assets such as gold. The portfolio manager can change the asset allocation of the Fund periodically in order to achieve the expected mix of 70% units of equity funds and 30% units of fixed income funds.
