

Pembroke Global Equity Pooled Fund

Investment Objective & Strategies

The Pembroke Global Equity Pooled Fund seeks to provide investors with long-term capital appreciation while lowering risk through diversification by region, by sector, and by market capitalization by investing primarily in funds including units of exchange traded funds. Subject to the target asset allocations described below, the investments of the Fund may include global and domestic equity funds, large cap and small cap equity funds, actively and passively managed equity funds, and individual securities listed on a recognized exchange.

The managers will target an asset allocation that will represent not more than 25% of the assets invested in a single fund and not more than 7% of the assets invested in a single security. The portfolio manager may change the asset allocation of the Fund at its discretion but expects that the portfolio will normally invest the majority of its assets in the funds of public equities.
